

Electronic Practice Acceleration Solution Suite

White Plume Technologies is the ingenuity leader in physician practice acceleration. More than 7,000 healthcare providers rely on our innovative applications and services to dramatically impact the front end of the revenue management cycle.

From the patient encounter to clean claim submission, White Plume's ePASS applications can provide your practice with extreme flexibility in capturing medical

charges effectively and efficiently. ePASS accelerates your practice by refining charges and accurately entering these charges into your billing system, resulting in a reduction in claim denials and a decrease in the amount of time spent on data entry.

ePASS is implemented with minimal change and disruption to your operation and can provide immediate benefits to your practice.

ePASS Features:

- > **AccelaSCAN™** - Scans superbills into your system in a fraction of the time it takes to key charges, improving accuracy and freeing practice staff to perform higher-return tasks
- > **AccelaCAPTURE™** - Captures charge data using an intelligent electronic superbill that provides faster practice throughput, improved accessibility, and digital information routing within the medical office
- > **AccelaPASS™** - Passes charge information electronically from EMR/EHR-based patient charts for immediate validation in the ePASS resolution engine
- > **AccelaSMART PREMIUM™** - The ePASS resolution engine offers a customizable, rules-based automated coding program that prevents denials on the front end and can conform to your practice-specific preferences, exceptions, variations, and change processing

“ We easily manage charge entry for 60 physicians with two FTEs. ”

Huntington Medical Foundation - Pasadena, CA

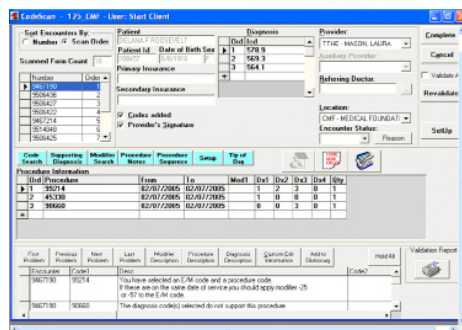

AccelaSCAN™

AccelaSCAN automates charge capture through the use of intelligent paper superbills that can be scanned at a rate of 1,200 forms per hour. This process replaces time-consuming and expensive manual charge entry, saving valuable time and improving accuracy. Charges that once required hours or even days to enter can be scanned in a fraction of the time.

AccelaCAPTURE™

AccelaCAPTURE replaces the manual keying of paper encounter forms with an electronic superbill that can be deployed on a wireless tablet, a laptop, a desktop PC, or a thin client. AccelaCAPTURE enables the physician to work quickly, while improving accuracy, providing faster practice throughput, improving accessibility, and enabling digital routing within the medical office.

Since AccelaCAPTURE is minimally invasive, your office can transition into a digital paperless environment without changing the way you currently operate.

AccelaPASS™

AccelaPASS is for practices that use a charge passing feature available in an EMR or EHR system. AccelaPASS sends charges directly from the external system into the AccelaSMART PREMIUM charge resolution engine, allowing the practice to continue taking full advantage of automated charge capture. Billing offices are provided with a channel for electronic review of physician billing before claims are submitted to the practice management system – all without changing the providers' current workflow. If AccelaPASS is used along with AccelaSMART PREMIUM, billing staff can reduce time spent manually reviewing charges, one by one, within the practice management system.

AccelaSMART™ PREMIUM

AccelaSMART PREMIUM is a customizable automated coding resolution engine that prevents denials on the front end, while conforming to your practice-specific preferences, exceptions, variations, and charge processing. Within the resolution engine, every charge is validated for compliance against a comprehensive set of standard edits and user-definable custom rules that conform to the specifics of your practice. Standard edits include Medicare CCI edits, medical necessity guidelines, and blended Local Coverage Determinations (LCD)s. Additionally, practices can create edits regarding specific payer, provider, and practice guidelines. AccelaSMART PREMIUM automatically routes any errors and missed charges to the administrative staff, along with real-time suggestions for correcting each encounter. The clean encounters are then uploaded to your practice management system for immediate processing. No other system can provide the same level of automation, flexibility, and adjustment that AccelaSMART PREMIUM offers.

“ Prior to using ePASS, our practice experienced a 10 to 15 percent rate of claim returns due to coding errors. With ePASS the error rate has dropped below 0.1 percent. We are very pleased with this product. ”

Rappahannock Family Physicians - Fredericksburg, VA
